

TASK 1: "ROBOTS IN LOVE"

A PLATFORM-BASED PUZZLE GAME.

RULES:

The puzzle is to get Blue Robot (the player) to the Yellow Robot.
If the Player (Blue Robot) touches the Red Robot, the player loses.

Only the Blue Robot can climb ladders and push items. (It CAN NOT pull or jump over objects)

SET OF OBJECTS THAT YOU CAN USE:

- a log
- a block of ice
- (if the log and the ice touches => you can design what will happen)*
- 2 x ladders
- ground element
- one platform element

- The Blue Robot (the player)
- The Yellow Robot (the goal)
- The Red Robot with flame (the enemy)

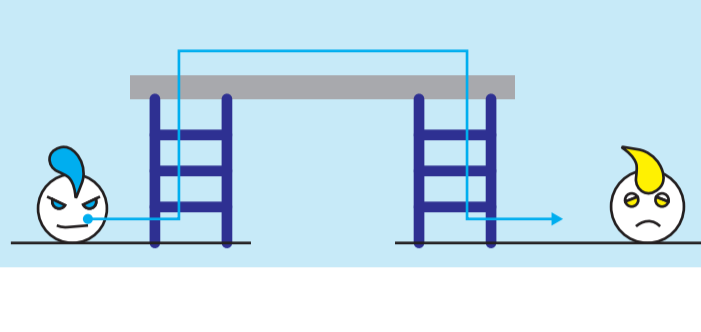

OTHER OBJECTS AND INTERACTIONS:

- If the Red Robot touch the block of ice, he becomes weak.
- If the Red Robot touch the log, it takes fire. The Blue Robot cannot pass until it's turned off by touching the ice cube and become ash.
- if the Blue Robot makes touch the "base" log whit the ice cube, it's become a frozen log. The Red Robot cannot pass over or push the frozen log, instead the Blue Robot can push it.
- The Red Robot moves at the same speed as the Blue Robot.

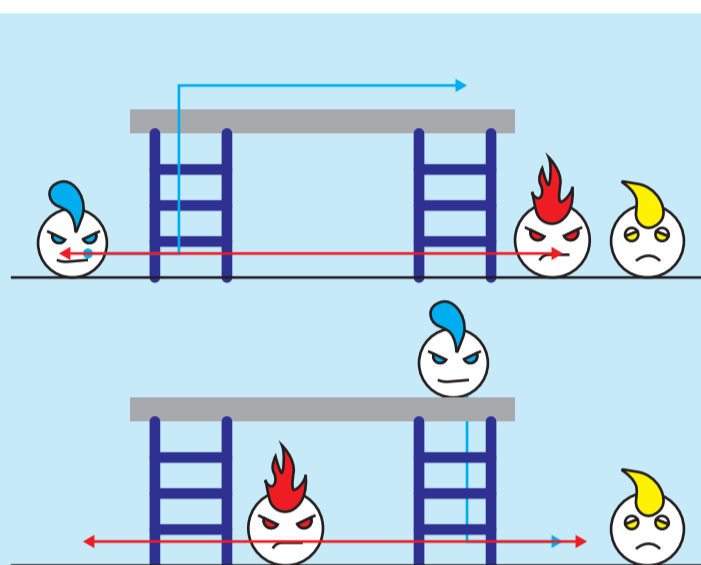

LEVELS:

Level 1

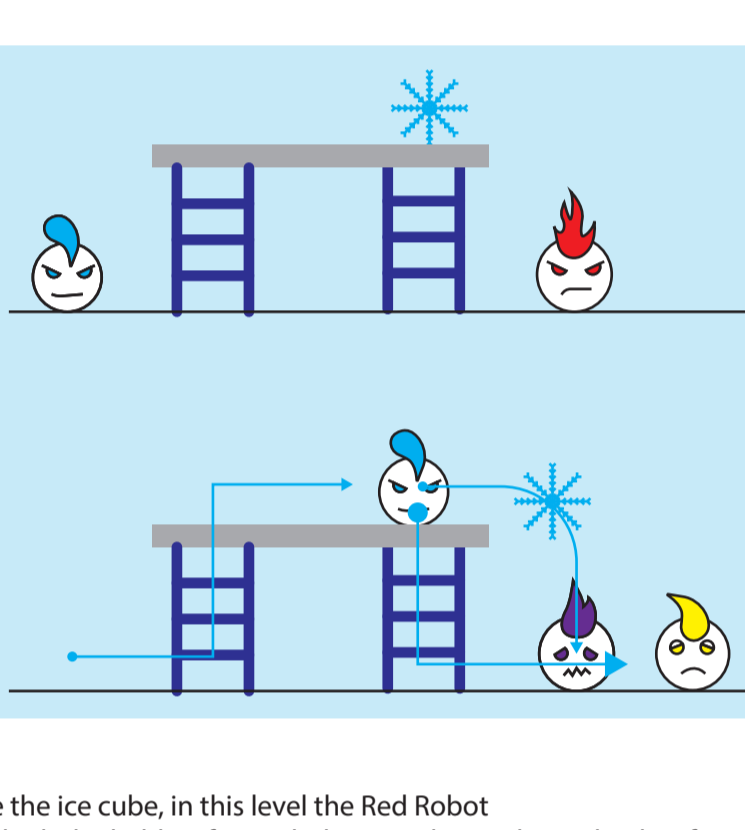

The first level introduce the ladders.
The Blue robot have to climb the ladders for not fall in the hole.

Level 2

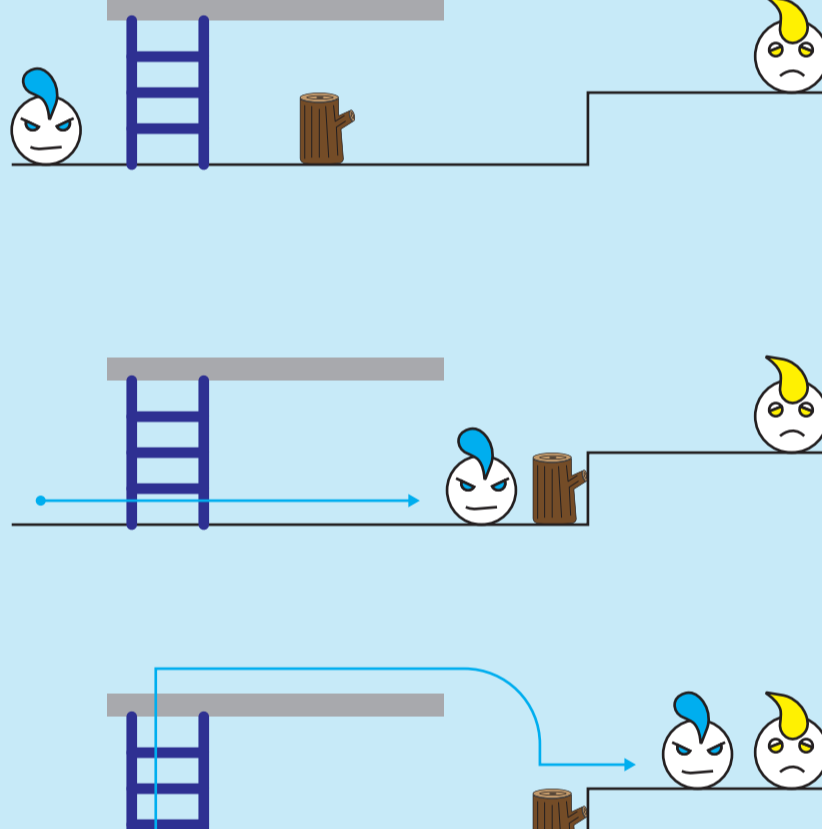

The second level introduce the Red Robot, that moves back and forth for all over the level.
The Blue robot have to climb the ladders for dodge the Red Robot.

Level 3

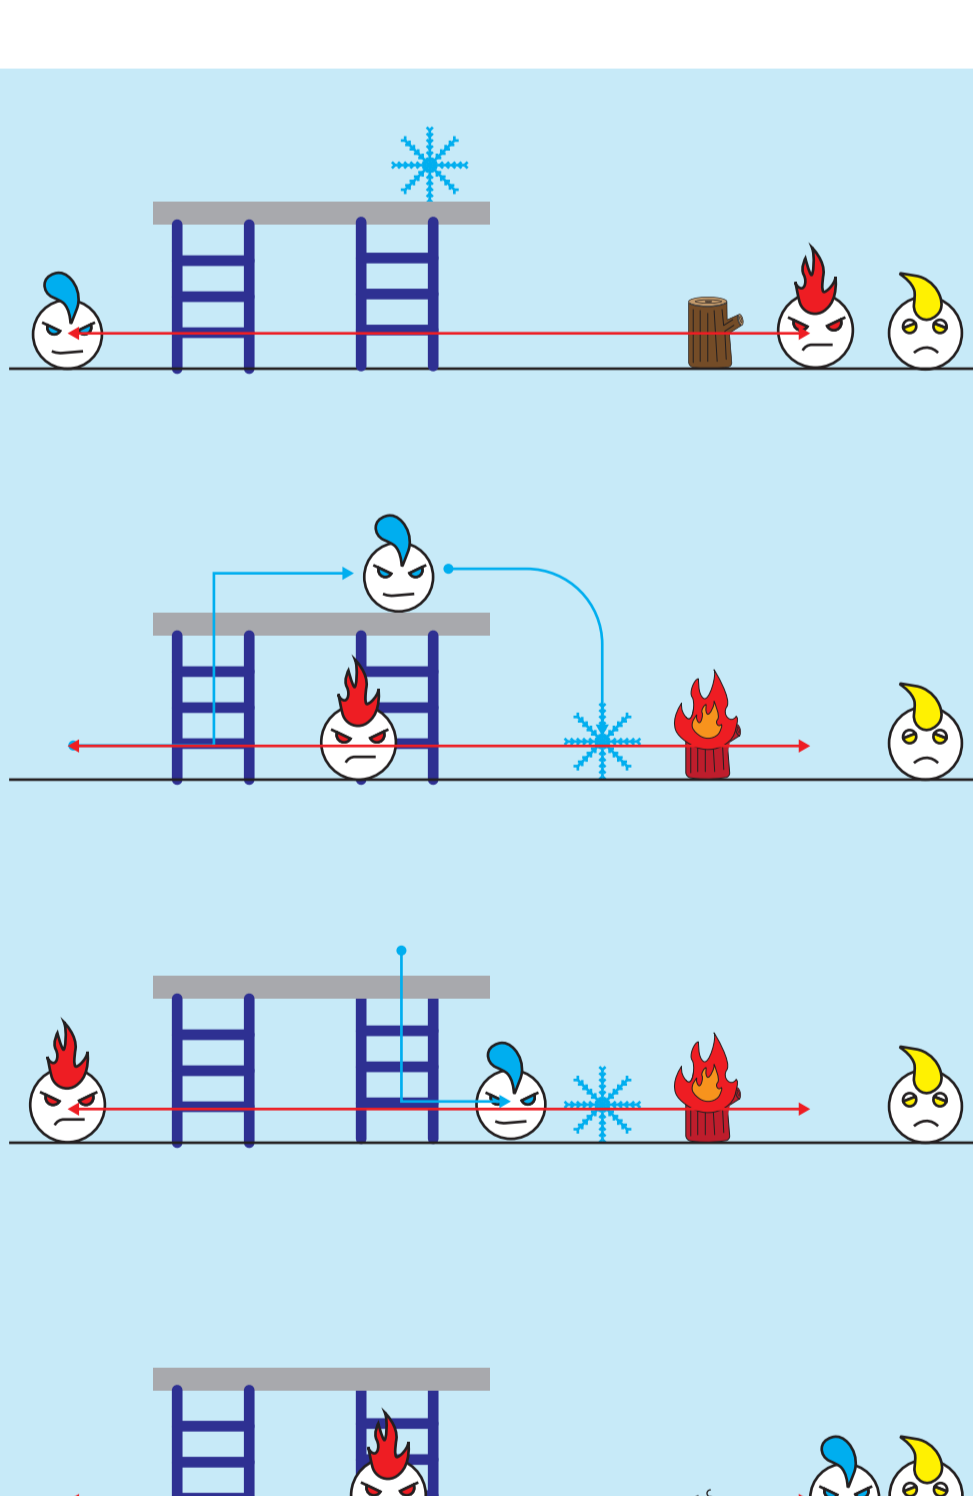

The third level introduce the ice cube, in this level the Red Robot
The Blue robot have to climb the ladders for push the ice cube on the Red Robot for make him weak and pass.

Level 4

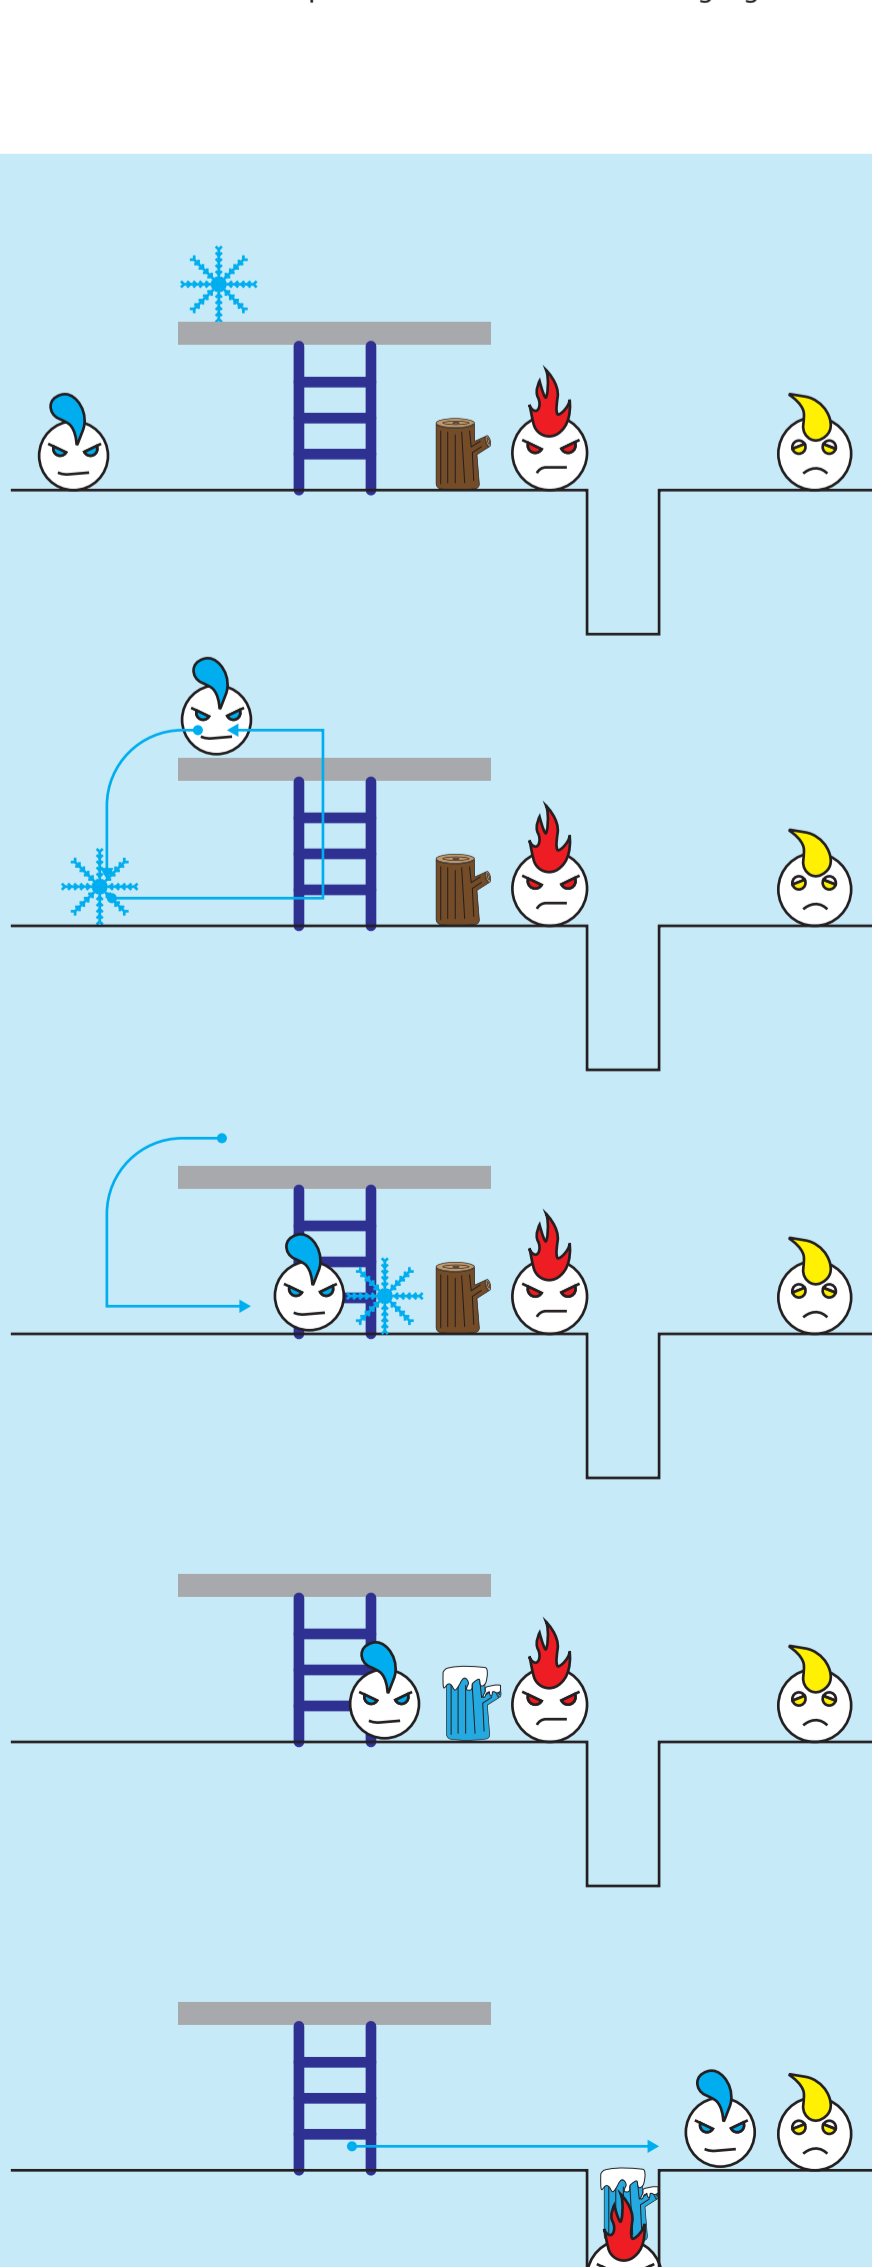

The fourth level introduce the log.
The Blue robot have push the log up to the step, then go on the platform and fall over the log.

Level 5

The fifth level introduce the burning log.
In this level the Red Robot moves back and forth for all over the level and when he touch the log sets it on fire.
The Blue robot have to climb the ladders for push the ice cube on the burning log for make it ash and pass.

Level 6

The sixth level introduce the frozen log.
In this level the Red Robot remains stationary after the platform.
The Blue robot have to climb the ladders for push the ice cube back to the start and than push it again in to the log, creating the frozen log.
Whit the frozen log the Blue Robot can push the Red Robot and and also the log in the hole for pass.
